In order to take care of yourself and your family members, each of you has individual targets and dreams besides the desire of excelling in life. In fact as business owners, even we have ambitions and dreams for achieving our targets which we set for ourselves and for the business, to keep evolving further.

BDPL strongly believes in multiculturalism in the workplace. Through this forum, I recognize that the efforts of employees from various socio-ethnic backgrounds contribute to the success of business. Therefore, to achieve our desirable targets, all stakeholders must seek a diverse business culture and work as a team. You are that employee group who remain with us in every facet of our business and we wish to make this association stronger and productive.

Employees are thereby requested to coordinate with all the other stakeholders, respect diverse business culture, by using the individual talent, hard work, sincerity, honesty, loyalty, besides dedicated and devoted service.

Kindly continue with your hard work, supply top quality product from our plant and be vigilant against negative forces which might mislead you to the detriment of our common goal. Please do not hesitate to take initiatives and work for our success. You and your family members are extremely dear to us and we will never let you down. We will also reward you handsomely.

HEALTHY BODY & MIND: THE SCIENCE OF YOGA

“Yoga is now recognized as the best scientific approach to keep our entire body systems healthy.”

Indians are the biggest contributor of original inventions to humanity. Vedas and Upanishads came from our Rishis and entire world has started recognizing this and are trying to follow the principles enunciated by them and encrypted in our brains.

One such Rishi is Acharya Patanjali, who taught The Science of Yoga to human race in 200 BCE. The Father of Yoga – Acharya Patanjali sought to discover and realize the ultimate reality through yogic practises. He prescribed the control of prana (life breath) as the best means to control body, mind and soul – resulting in good health and inner happiness to all.

Acharya Patanjali's 84 yogic postures effectively enhance the efficiency of the respiratory, circulatory, nervous, digestive and endocrine systems and thereby all organs of the body to attain the ultimate bliss of God in Samadhi through the disciplines of Yam, Niyam, Asan, Pranayam, Pratyahar, Dhyana and Dharna. Yoga is now recognized as the best scientific approach to keep our entire body systems healthy.

Tribute to
ACHARYA PATANJALI

BDPL is happy to announce that Parshuram will be conducting regular yoga classes for those interested

Keeping our body and mind healthy is the single dose of medicine required to learn and master the areas of interest to us and help us, our family & our society lead peaceful and prosperous life, which ultimately culminates in a Happy Mind. And a **Happy Mind is the single basic need for achieving maximum productivity.**

We want to guide all interested employees to be most productive in life by practising Yoga & Meditation. A qualified Yoga Master shall be recruited to impart necessary training to you as early as possible.

Let us salute Acharya Patanjali for helping us to maintain healthy body.
